

DEKK Skid Steer Rubber Tracks have been designed and manufactured with a high level of engineering and precision to ensure they withstand the rigours of earthmoving and construction applications.

The core features and benefits that make DEKK Skid Steer Rubber Tracks (Block Pattern) last longer and work harder are:

- 1 COMPREHENSIVE RANGE OF RUBBER TRACKS**
to suit leading OEM brands including Kubota, Takeuchi, Terex, CAT, Bobcat, Case, Komatsu and others
- 2 CONTINUOUSLY WOUND HIGH TENSILE STEEL CABLES**
prevents corrosion, provides greater strength and durability and eliminates weak points caused by joints found in spiral wound cables
- 3 HEAVY DUTY RUBBER COMPOUND**
provides greater flexibility & wear resistance and minimises punctures & tears, resulting in reduced maintenance & downtime and extended track life
- 4 PRECISION FITTED STEEL CORE BARS**
for maximum strength and reduced risk of detracking
- 5 REDUCED VIBRATION**
resulting in improved operator comfort and reduced noise
- 6 BLOCK PATTERN TREAD IDEAL FOR HARSH TERRAIN**
Improves traction and extends track life

TECHNICAL SPECIFICATIONS

Track Width	Pitch	Core Bar	Rubber Compound	Steel Cable	Tread Pattern	Tread Life	Warranty	Suit OEM Brands
250mm to 450mm	86mm to 100mm	Steel	Heavy Duty Natural & Synthetic Fibre Virgin Rubber	Continuously Wound, High Tensile	Block	1 to 2yrs*	12mths	Kubota, Takeuchi, Terex, CAT, Bobcat, Case, Komatsu & others

* Based on normal operating conditions of the equipment.

**12 MONTH
FULL-REPLACEMENT
WARRANTY**
